CHAMBERLAIN'S ALMANAC

and

RELIABLE WEATHER FORECASTS
for Family Field and Garden

PLANTING BY THE MOON

CHAMBERLAIN MEDICINE CO.
DES MOINES, IOWA.

A—for the Ani of Texas. Very vain of his big bill so fine;

B—for the happy Blue Birdies. On grasshoppers green they will dine.

"BONNY BIRD CARDS"—FREE TO ALL CHILDREN

SEND FOR THEM.—All children should have a set of these "Bonny Bird" Cards, with their quaint alphabetical rhymes and accurate information of the character, nest and note of each Bird. Children love them, and they help to while away many a tedious hour. To secure a set free of cost, drop a postal to Chamberlain Medicine Co., Des Moines, Iowa, writing your name and address clearly. Kindergarten, first grade and Sunday school teachers regard them as useful and valuable.

A GOOD THING—DON'T MISS IT

Send your name and address plainly written together with 5 cents (stamps or coin) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu," and whooping coughs, and tickling throat; Chamberlain's Tablets for stomach troubles, gassy pains that crowd the heart, biliousness, and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds, piles, and skin affections. Try these valued family medicines for only 5 cents.—Don't miss it.

CHAMBERLAIN'S COUGH REMEDY

Established in 1872

For Infants, Children and Grown Persons

Contains No Narcotics

Reduced Facsimile

A standard family medicine, prompt, reliable and effective for Coughs, Colds, Croup, Bronchial Coughs, LaGrippe and Influenza Coughs, Coughs resulting from Whooping Cough, Nervous Hacking, Tickling Throat, Troublesome Night Coughs and the Chronic Coughs of Elderly People.

In three sizes: 35c, 60c, \$1.00. It is more economical to buy the large size as it contains about 5 times as much as the small size and $2\frac{1}{2}$ times as much as the medium size.

"PROTECTION" In Your Home

Over fifty years of useful and invaluable service stands to the credit of Chamberlain's Cough Remedy, and in all that time we have never heard of a single dissatisfied user, nor of a dealer who is not glad to recommend it in the highest terms to his patrons. Today it is constantly increasing in favor and popularity. Those who in childhood took it for coughs, colds, croup and whooping cough are now giving it to their children and grand-children in turn with the same good results. It has been extensively

advertised but the personal recommendations of people who have been cured by it have done more than all else to increase the sale and the use of this preparation, until there are now more bottles of it sold each year than of any other cough medicine.

The fact that its effects are almost instantaneous, that it contains no opiate or other narcotic, is pleasant to take, and has no disagreeable after-effect on the stomach, adds greatly to its popularity.

C—for the saucy Canary. Take care, or your finger he'll bite.

D—for the quiet Dick-sissel. Who sings "che-che-che" for Good Night.

ASTRONOMICAL CALCULATIONS FOR THE YEAR 1923

Eras of Time

The Gregorian year 1923 corresponds to the following eras:

The latter part of the 147th and the beginning of the 148th years of Independence of the United States. The year 7432 of the Byzantine era begins on September 1st, Julian calendar. The year 5684 of the Jewish era begins at sunset, September 10th, Gregorian calendar. The year 2583 of the Japanese era. The year 1342 of the Mohammedan era begins at sunset, August 13th. The year 6636 of the Julian period, and January 1st, 1923, is the 2,423,421st day since the beginning of the Julian period.

WEATHER FORECAST FOR JULY, 1923

1st and 2nd, intense heat and fair; only showers in east Gulf states. 3rd to 6th, storm period; furious wind storms followed by heavy rains in Gulf states and wind and hail storms in the lake region and Ohio river valley; dry and windy in northwest and Rocky mountain region. 7th to 11th, warm wave; hot and dry, especially in Western states, but seasonable for crops east of the Mississippi river. 12th to 14th, hot wave and violent thunder storms, especially on date of New Moon. Frequent showers may be expected in the south and east, while drought prevails in Western states, rainfall being light to most sections west of the Mississippi river. 15th to 17th, sultry period and droughty conditions in the west not relieved. 18th to 21st, general storm period—a Venus period, with Moon on the equator on the 19th. Expect some violent storms of wind, rain, hail and thunder, with temperatures high in middle west, 22nd to 25th, clear and warm with only light local showers. 26th to 29th, storm period and cooler weather in north and northwest; frequent showers in Gulf states. 30th and 31st, fair and cooler in middle and northern states; showers in Georgia and Florida.

FARM AND GARDEN BULLETIN

July—1st, unfavorable. The 2nd, 3rd and 4th will be extra good days to sow, plant and transplant all kinds of crops. Fish will bite extra well on these days. 5th and 6th, good for producing vine and stalk, hence, crops planted on these days will do well for hay and fodder. From 7th to 9th, good time to plant potatoes, beets, turnips, radishes and peanuts. 10th and 11th, plant melon and cucumber seed. 12th and 13th, sow peas and beans, transplant tomatoes. Best days of the month to kill weeds, briars and bushes, but bad to plant and sow, on the 14th, 15th and 16th. Bad time to plant on the 17th and 18th, but moderately good on 19th and 20th. Very unfavorable from 21st to 29th. Good days to plant and sow all crops on 30th and 31st. Best time to kill pork, beef and all animal meat from 1st to 7th and 28th to 31st. Good time to fish and make sauer kraut on 2nd, 3rd, 4th, 30th and 31st.

IMPORTANT NOTICE—READ THIS!

Under heading of "Farm and Garden Bulletin" we give each month valuable information—"When to plant and harvest, handle cattle, set hens, start incubators," etc. These monthly bulletins are good for all sections of the United States, depending upon climate and latitude. When the regular planting time comes for your own locality then follow the "Bulletin" for that month.

E—for the elegant Egret. So proud of her beautiful crest;

F—for the red-shafted Flicker. All spotted with brown is his vest.

Hang It! Oh Hang It! Hang It Up!

Hang up Chamberlain's New Almanac
A handy nail will do,
For many times you'll need it
Before the year is through.

It tells you of the weather,
The time to plant and sow,
And when to set the "biddies"
That start the chicks to grow.

It tells you when to butcher,
And when to make your kraut,
And when the chores are finished,
Best time to fish for trout.

There's Bird Cards for the Babies,
And tips for every one,
There's Medicines—and quite the best
Of any under the sun.

An accident may happen,
Or croup may cause a fright,
A headache, chill or colic pain
May seize you in the night.

Rheumatic pains, a sprain, stiff neck,
A burn, a scald may hit you,
But if you turn to Chamberlain's,
There's something there will help you.

So be sure you hang up Chamberlain's
Whatever you may do
With all the other almanacs
Your druggist sends to you.

DO YOUR CHILDREN DO THIS?

They do, and very likely you did it yourself when a child and when you reached home from school, wet to the knees from paddling in the fascinating puddles, very likely your mother got out her bottle of Chamberlain's Cough Remedy and dosed you and your little brothers and sisters with it, just as you do your own children now. And it tasted so good and it warmed you up and made you feel so nice and "comfy" that it was just part of the joy of "puddling."

No colds, no sore throat, no sneezing and chilliness followed its use. No ugly croup to scare one at night but every child up and ready for school again the next day.

Oh, it is a great cough medicine, is Chamberlain's Cough Remedy, and there are more bottles sold of it each year than of any other cough medicine and every wise mother keeps it on hand.

WEATHER FORECAST FOR AUGUST, 1923

1st to 4th, general storm period. Short and sharp electrical storms with heavy rains, especially in mountain regions of Kentucky, Virginia, North Carolina and Pennsylvania. 5th to 10th, hot, sultry period, hot and dry, especially in southwestern states and on north Pacific slope, also in portions of New York and Ohio. Local showers in the middle and upper Mississippi river valley. As a rule growing crops will be doing well. 11th to 16th, storm period; very warm to most all sections with showers and violent thunder storms over many sections; fierce storms and heavy rains in Appalachian range and foothills. Drought conditions in many sections of the west. 17th to 20th, unsettled and showers in south and east; fair and cooler west of the Mississippi river. 21st to 24th, generally fair and moderately warm, becoming cloudy and showery in northwest on 23rd and 24th. 25th to 28th, sultry and threatening, with violent thunder storms in northern and eastern sections. 29th to 31st, mild period; cooler in the north and generally clear; rather dry west of the Mississippi river. Temperature for the month about normal and a deficiency in rainfall west of the Mississippi river.

FARM AND GARDEN BULLETIN

August—1st to 3rd, crops planted on these days will produce vine and stalk and but little grain. 4th and 5th, good to plant potatoes, beets, turnips and radishes. From 6th to 8th, favorable for sowing cucumber and melon seeds only. 9th and 10th, sow peas and beans. 11th and 12th, best time of year to destroy weeds, briars and bushes; cut them now and they will not come again so vigorously as if cut at other times. 13th and 14th, bad time to plant, etc. 15th and 16th moderately good. From 17th to 25th, very bad. 26th and 27th, good time to plant, transplant and sow. From 28th to 30th, bad. 31st, fine time to sow turnips and other root crops. Best time to kill pork, beef and all animal meat is from 1st to 5th and 26th to 31st. Good time to castrate live stock, fish and make kraut is on 26th and 27th. Set hens and start incubators on the 20th to 24th.

COOKING "TIPS"

Salt added to potatoes when nearly done insures floury potatoes and prevents them going to pieces.

To prevent the odor of boiling cabbage put a small piece of white bread in the pot.

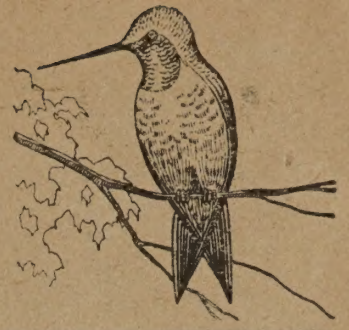

Before baking potatoes prick with a fork so that the air can escape and prevent their bursting open.

A little lemon added to water in which rice is boiled will whiten it wonderfully and also help to keep the grains separated.

G—for the rose-breasted Grosbeak. Who sings us a song clear and strong;

H—for the red-throated Humming Bird. Sipping sweets from the flowers all day long.

HOW THE MOTHERS OF "THE NEIGHBORHOOD SOAP CLUB" HANDLED WHOOPING COUGH

Isn't it just natural for mothers to want the BEST for their children! And when "Mother" is out for the BEST, isn't she just going to get it? She surely is! And that's the big reason why there are more bottles sold each year of Chamberlain's Cough Remedy than any other cough medicine.

Why, when the whooping cough swept right through our neighborhood and all the children had it and none of us could sleep at night what with the whooping and coughing and looking after them and Mrs. Lloyd at the meeting of the Neighborhood Soap Club, told us all how she helped little Dorrie and Bobbie with Chamberlain's Cough

Remedy and what a difference it made in their family to give it to the children, why believe me, the mothers could hardly wait until the meeting was over, they were so anxious to get to the drug store to buy it. And at the very next meeting of the Neighborhood Soap Club they just up and gave Mrs. Lloyd a vote of thanks for telling them about it.

That's one great thing about Chamberlain's Cough Remedy: every user is a friend, and is glad to tell her neighbor all about it. It is certainly great for coughs and colds, for croup and any kind of cough that hits either the young or the elderly people. Keep a bottle in your home and you will nip many a cold, cough and raw inflamed throat right in the bud. You'll save on your doctor bills, too.

WHEN DREADED CROUP COMES

A thing of dread, that comes in the night without warning. Just a hoarse metallic cough, a choking, gasping for breath, a threat of suffocation. Oh the relief of knowing that there is a bottle of Chamberlain's Cough Remedy in the house! See how quick and certain it acts, how it clears away the choking phlegm, stops the hoarse cough, and rest and sleep come to the little sufferer.

Oh Mothers! Do not fail to keep this simple, safe, reliable remedy in your house, for never can you tell just when the need for it will come and the time spent to reach your doctor or druggist may be in truth just the fatal time. For whooping cough, measles cough and the coughs that come with most children's diseases, it is invaluable.

Do not forget that there are more bottles sold each year of Chamberlain's Cough Remedy than of any other cough medicine. Have you a "handy" bottle of it right now?

WEATHER FORECAST FOR SEPT., 1923

1st to 3rd, cool and pleasant period with northerly to northeasterly winds; clear skies and generally dry and dusty, especially west of the Mississippi river. 4th to 8th, warm or hot wave; temperature near the 100 mark in west and southwest, reaching the southeast on the 6th, 7th and 8th. 9th to 12th, storm period, with New Moon on the equator. Watch out for trouble, as there is danger of a West India storm at this time. Violent thunder storms over a large territory. Cold, with frosts in northern Rocky mountain regions on the 11th and 12th. 13th to 17th, cool wave, but fair and generally pleasant. 18th to 21st, fair period, becoming very hot and sultry; generally dry. 22nd to 25th, equinoctial storm period, with a Mercury-Mars disturbance added. Some very stormy weather, especially near the Gulf and Seas, but rainfall will not be up to the average; early snows in northwest and very cold for the season. 26th to 30th, milder and pleasant, northerly to westerly winds, with storms in the east on the 26th; killing frosts in lake region on the 26th and 27th. Temperature for the month will be above the average and rainfall below.

FARM AND GARDEN BULLETIN

September—1st and 2nd, good days to sow turnips, beets and radishes. 3rd and 4th, good to sow cucumbers and melons only. 5th and 6th, good for sowing peas and planting beans. 7th and 8th, fine time to kill weeds, briars and bushes. 9th and 10th, bad time. 11th to 13th, moderately good. From 14th to 21st, very unfavorable for planting all crops. The 22nd, 23rd and 24th will be extra good days for all kinds of planting and sowing; also harvesting hay and fodder or castrating live stock, fishing and making sauer kraut. 25th and 26th, unfavorable for planting. From 27th to 30th, favorable for planting onion sets and sowing turnips. Best time and only good time of month to slaughter hogs, beef and other animal meat will be from 1st to 4th and 25th to 30th; very unfavorable for such work from 10th-19th.

VEGETABLE "TIPS"

Cook macaroni in rapidly boiling salted water.

Let wilted vegetables soak for some hours in cold water before cooking.

Let dried vegetables soak in cold water several hours or over night.

All vegetables are set to cook in boiling water.

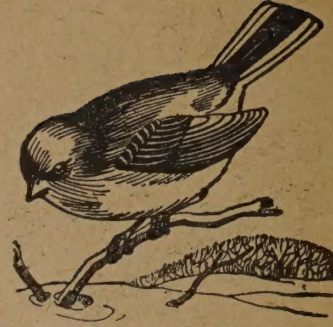

In general cook all vegetables save those containing much cellulose (woody fiber) in salted water.

Parsnips and turnips as well as legumes are best cooked without salt.

I—for the Ivory-billed Woodpecker. This red-crested bird we all know;

J—for the small cheery Junco. Who is happiest in the deep snow.

COUGHING TIRES THE OLD

Helping Grandma! And who so happy as Grandma herself when the Little Helpers come! And what are they bringing her? Why, a bottle of Chamberlain's Cough Remedy, to be sure.

For coughing tires the old, who, racked and tormented by painful weakening coughs, are very quickly made easy and comfortable by Chamberlain's Cough Remedy.

The very first doses help, stopping those ugly coughs that tire them out, rob them of their rest, deplete their strength and lower their vitality and resistance to disease. Ask for Chamberlain's Cough Remedy, and do not be persuaded to buy any other.

THERE IS "PROTECTION" IN THIS HOME

In the well-ordered household of Mrs. Gust Niemi, 1079 - 25th Street, Milwaukee, Wis., you will always find Chamberlain's Cough Remedy, for she says "We have had it in our house for years, and I have used it with good results for my children and for my husband. I am glad to tell about it, in fact I always have a bottle on the shelf in case the children get a cough." One can guess that coughs and colds make little headway in that household.

COUGHING?

"Are You Raising Anything?"

That is one of the first questions a doctor asks when you consult him about a cough. For the doctor knows that coughs are nature's effort to rid the system of the irritating secretions that need to be expelled before healing takes place in the air passages, the bronchial tubes and the lungs.

Chamberlain's Cough Remedy differs from others and is superior to them in just this essential point—that it does more than just "stop the cough," it collects the secretions from the irritated surfaces and expels them from the system in the shape of mucus or phlegm. For these dry, hacking, unproductive coughs are objectionable and just to stifle them without healing the cause, as many cough remedies do, is to seal up in the system harmful germs that hold in themselves the possibilities of grave danger.

This is just another one of the many reasons why Chamberlain's Cough Remedy is superior to all others and is a very urgent reason why you should insist upon having Chamberlain's Cough Remedy and should refuse to accept any other offered to you in its place.

WEATHER FORECAST FOR OCTOBER, 1923

1st to 5th, pleasant period, with killing frosts on 1st and 2nd in upper Miss. river valley and Lake region, growing much warmer to all sections on the 3rd, 4th and 5th; showers in extreme west on the 5th. 6th to 9th, storm period. A western low barometer area will cause storms along its eastward march—warm with thunder showers to the south and high winds and cold rains or snows north of the storm center, turning much colder on the 9th in the Mo. river valley. 10th to 13th, cool and frosty, with exception of storms in the east on the 10th. 14th to 17th, unsettled and local storms in south and east; showers in the west. 18th to 20th, fair and much cooler; general frosts north of the 37th parallel, turning warmer in the west on the 20th, with increasing cloudiness 21st to 24th, general storm period; a wide-spread and severe storm, beginning warm and turning to severe cold in northwest on the 23rd and 24th, with heavy snow storms. 25th to 27th, cold wave and killing frosts north of the 35th parallel. 28th to 31st, generally fair, with temperature rising, becoming warm in the day-time on the 30th and 31st.

Temperature for October slightly above average in the south and below in the north. Rainfall slightly above normal.

FARM AND GARDEN BULLETIN

October—1st, unfavorable. From 2nd to 4th, favorable for sowing peas and planting beans where climate will permit. 5th and 6th, unfavorable for planting, but good time to destroy weeds, briars, etc. 7th and 8th, very unfavorable for planting and sowing. 9th and 10th, moderately good. From 11th to 18th, very bad. The 19th, 20th and 21st will be extra good days for farm and garden work; sow onion seed, set new strawberry beds and start grape cuttings and sow grass seed. 22nd to 24th, unfavorable, except for sowing cucumber and melon seeds. 25th and 26th, good for sowing turnip seeds and putting out onions. From 27th to 31st, unfavorable. Best time to kill pork, beef and all animal meat, will be from 1st to 3rd and 25th to 31st, inclusive. Best time to dig potatoes, pick apples from trees, so as to keep well will be from 24th to 30th. Castrate livestock, fish and make sauer kraut on 19th and 20th.

SANITARY "TIPS"

Lime will clear water which has a bad odor.

Burning vinegar will purify the air of the kitchen.

Anything with an odor should be placed at the top of the ice-box.

Flies may be killed by setting around a dish containing a mixture of cream, ground black pepper and sugar.

K—for the belted King-fisher. He can fish without hook or line;

L—for the Long-Spur of Lapland. But of him we have never a sign.

CHAMBERLAIN'S LINIMENT (Penetrating)

Feels good to the skin. Reaches and eases the pain.
Allays the rheumatic ache. Relaxes stiff and swollen joints, reduces swellings, helps lame back.

Reduced Facsimile times its cost. It does not stain the hands or clothing and is almost completely absorbed after five minutes vigorous massage.

TO RELIEVE SORENESS OF THE MUSCLES AND RHEUMATIC PAINS

"I have found Chamberlain's Liniment a splendid remedy for lameness, sore muscles and rheumatic pains. In fact it is the best liniment we ever had in the house and I advise any one in need of a liniment for aches and pains to give Chamberlain's a trial," writes Mrs. J. W. Wallace, Macon, Mo.

LUMBAGO

This is a rheumatism of the muscles of the back. It comes on suddenly and is quite painful. Every movement aggravates the disease. Go to bed, keep quiet and have Chamberlain's Liniment applied and a quick recovery may be expected. Mrs. F. J. Dann, Brockport, N. Y., writes: "I can honestly say that Chamberlain's Liniment cured me of lumbago a year ago last summer. When I began using it, I was flat on my back in bed and could not turn to the left or right. I had a bottle of Chamberlain's Liniment in the house and this was applied to my back. It promptly drove away the pains and aches."

SURE RELIEF FROM SUFFERING

Whether you do it yourself, or some one does it for you, just a few minutes of vigorous massage with Chamberlain's Liniment and its warming, soothing, pain-easing quality is soon felt. It stimulates the circulation and by so doing, scatters the congestion leaving a feeling of warmth and comfort and a lessening of pain. Use it freely for rheumatic pains, lumbago, lame back, sciatic and neuralgic pains, for stiff swollen joints and muscles, for sprains, bruises and backaches. Once you are acquainted with its good qualities you will want to keep it in your house constantly. The relief from pain is alone worth many

WEATHER FORECAST FOR NOV., 1923

1st to 5th, mild period and fair east of Rocky Mountains, growing cloudy and very stormy in Rocky Mountain districts and on Pacific slope on 4th and 5th. 6th to 9th, storm period, very high winds, especially in the Great Lake region, where shipping will be greatly endangered. This is a Mercury period and will bring cold weather with much sleet and snow in northern latitudes and misting rains over the south. 10th to 12th, cold wave, bringing frosts well down into Gulf states and hard freezes in middle sections. 13th to 17th, mild period. Pleasant in Middle and Southern states; unsettled with local rains in the Lake states, St. Lawrence valley and far northwest. 18th to 21st, storm and earthquake period. High winds and driving rains, turning to snow north and east. 22nd to 24th, cold wave for the West and Northwest and unsettled in the Southeast and East. 25th to 30th, mild period; fine weather in general, with smoky skies resembling "Indian Summer," turning to cloudy weather in the West and Southwest on the 30th. Thanksgiving Day will be a fine day. Rain-fall below the average for the month and temperature higher.

FARM AND GARDEN BULLETIN

November—1st and 2nd, good time to destroy weeds, briars and bushes, but very bad time to dig potatoes, set trees, etc. 3rd and 4th, unfavorable for planting. 5th and 6th, moderately good. From 7th to 15th, very unfavorable for planting, but very good for setting fruit trees, transplanting raspberries, rosebushes, grafting trees and pruning vines, etc. 16th and 17th, favorable for planting. 18th to 20th, unfavorable. 21st and 22nd, plant root crops. From 23rd to 25th, good for cucumbers and melons only. From 26th to 30th, unfavorable for planting. Best time to kill pork, beef and all animal meat is from 1st to 3rd and 23rd to 30th; worst time, 8th to 16th. Best time to dig potatoes and pick fruit from trees, 23rd to 26th. Castrate live stock, fish and make kraut on 16th and 17th.

CUT FLOWER AND PLANT "TIPS"

Pansies and daisies can be effectually grouped with hyacinths and early tulips.

Flowers may be revived by plunging the stems into boiling water.

The water in which beef has been washed is very good for plants. Roses and geraniums especially are benefited by it.

When watering house plants take a small funnel holding close to the roots then pour water in it. This prevents the water spattering on window sills.

M—for the bold thieving Magpie. In mischief he dwells with much glee;

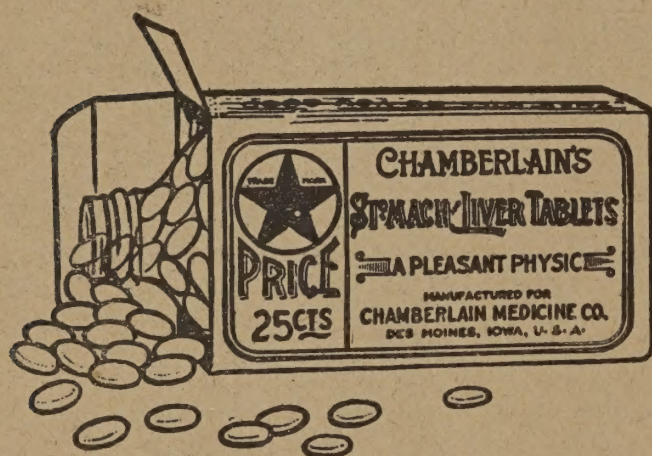

N—for the busy Nut-hatches. Who can walk up-side-down round the tree.

CHAMBERLAIN'S TABLETS

For Indigestion, Stomach Troubles, Biliousness, Sick Headaches and Constipation

Easy to take, pleasant in effect; no griping, no nausea; handy package, costs but little; only 25c. Give tone and healthy activity to the entire intestinal tract.

From infancy to old age, we are, most of us, dogged with the Specter of Constipation. There are very few of us who have not at one time or another, suffered its evil consequences. Constipation is so serious an affection that it is charged with being the source of more human misery than any other one cause. It must, therefore, be a matter in which most of us are vitally interested and the wise selection of a Standard Family Laxative is of great importance.

Chamberlain's Tablets for Stomach, Liver and Bowels, offer just this wise choice of a Standard Family Laxative valuable to all members of the family. It offers even more than that—in its tonic and strengthening effect on the entire intestinal tract, it aids digestion, prevents dyspepsia, stomach troubles, gassy pains that crowd the heart, takes away that full and bloated feeling and gives once again the free enjoyment of eating.

Then there is its splendid effect on the liver. That great "filter" of the body, when it becomes lazy, torpid, swollen and inactive, can be persuasively brought back to healthy normal activity, by Chamberlain's Tablets; and that too without any disturbance to the stomach or other organs and without any sickening doses of calomel to leave one feeling wretched the next day. On the contrary, the "next day" feeling after Chamberlain's Tablets is a feeling greatly to be desired and "hankered" after. It is a feeling of renewed life and vigor, of returning vim and energy.

If you have a friend suffering from indigestion, stomach trouble, biliousness or periodic bilious attacks, sick headaches, constipation; or one who feels the necessity of taking a weekly cathartic, send us the name and we will take pleasure in mailing samples of Chamberlain's Tablets, for a trial.

WEATHER FORECAST FOR DEC., 1923

1st to 4th, unsettled period; snow and rain alternating in the lake region and up through the St. Lawrence Valley, warmer over the south with much rain and thunder; high barometer and cold wave in northwest. 5th to 7th, moderate cold wave, with killing frosts as far south as the Gulf and South Atlantic Coast lines. 8th and 9th, cloudy and much warmer with rain over the south and local snows in northern latitudes. 10th to 12th, bright, pleasant days and cool, frosty nights, turning cloudy and stormy in far west on the 12th. 13th to 16th, severe storm period, bringing high winds and rain to the south and heavy snows and blizzards in west and north. Quite low temperatures will prevail in the northwest on the 15th and 16th. 17th to 19th, cold wave of moderate note over Northwest and North and unsettled in the south and east; cold rains, turning to sleet in Ohio River Valley. 20th to 22nd mild period; pleasant and fine, followed by showers in east Gulf states on the 22nd. 23rd to 25th, storm period, with high winds, rain and snow. Christmas Day will be unsettled. 26th to 28th, fair and colder. 29th to 31st, cloudy and unsettled, snow. Temperature above and precipitation normal for December.

FARM AND GARDEN BULLETIN

December—1st and 2nd, bad for planting and sowing. 3rd and 4th, reasonably good. From 5th to 12th, very bad for planting and sowing. 13th and 14th, good time to sow and plant all crops. 15th to 17th, very bad. 18th to 20th, good to plant and sow root crops. 21st and 22nd, good to sow cucumber and melon seeds only. 23rd and 24th, good for sowing peas and beans. From 25th to 31st, unfavorable for planting and sowing. Best days to kill pork, beef and all animal meat is from 23rd to 31st, inclusive, the 25th, 26th and 27th, being extra good days. Graft and set fruit trees and prune vines from 9th to 17th. Dig potatoes and gather fruits on the 23rd, 24th, 25th. Castrate live stock, fish and make sauer kraut 13th and 14th. Set hens and start incubators from 15th to 19th.

If your NECK were as long as a Swan's and it "tickled" and "tickled" all the way down, you could stop that "tickle" at once with a few sips of Chamberlain's Cough Remedy.

Stops those troublesome night coughs, too.

O—for the dashing Oriole. So brilliant and gay are his wings;

P—for the cute little Pipit. Soaring high in the air as he sings.

Chamberlain's Tablets also exercise a fine effect on the colon and smaller intestines, preventing that accumulation and stagnation in these organs, that is so prolific of auto-intoxication, that re-absorption into the system of those poisons that should be passed out of the body in waste matter. Here is where the actual harm and poisoning from constipation takes place and it is just here that Chamberlain's Tablets again show their superiority. Finally, their thorough cleansing of the lower bowel and the peristaltic action they exert throughout the intestines, completes their work—a record that for value as a medicine places them far and away above that great mass of laxatives that aim only to clear the lower bowel and leave untouched the suffering stomach, the clogged liver and the poison-breeding colon and small intestines.

Chamberlain's Tablets are so easy to take, so pleasant in action. There is no feeling of griping or nausea. They are put up in a handy little packet and the cost is so little—only 25c. Why suffer, why endure the discomfort and misery of stomach disorders, biliousness, sick headaches, the poisoning of the system, when Chamberlain's Tablets may be so easily had and for so small a cost. Your druggist sells them.

PEP AND VIGOR COME AS CONSTIPATION GOES

And it all happens so easily and naturally one hardly realizes they have taken a medicine except for the wonderful after-effect. Mrs. J. M. Young, New Hope, Ala., says that Chamberlain's Stomach and Liver Tablets are the best thing she has ever used for constipation. They do not make her feel sick or weak after taking and they are so thorough in action that she has never had to use calomel for biliousness. They take care of the entire intestinal tract and that without any nausea or griping pains.

WHAT THEY DO FOR BILIOUS HEADACHES

"When you have a severe bilious headache, a disordered stomach and constipation, take three of Chamberlain's Tablets. They will correct these disorders, effectually curing the headache. "They are the nicest and pleasantest medicine I ever used for indigestion and constipation," writes M. F. Craig, Middle Grove, N. Y.

FINALLY FOUND CURE FOR INDIGESTION

"Chamberlain's Stomach and Liver Tablets suit my case better than any dyspepsia remedy I ever tried. I have suffered a great deal from indigestion, but now I can eat almost anything I want." That is the experience of Mr. G. W. Emory, Rock Mills, Ala. Then Mrs. George Stroup, Solvay, N. Y., had a similar experience, and writes: "Prior to using Chamberlain's Tablets I suffered dreadfully from indigestion, for nothing I ate agreed with me and I lost flesh and ran down in health. Chamberlain's Tablets strengthened my digestion, and cured me of constipation." What they have done for others they will do for you too. Try them.

WEATHER FORECAST FOR JANUARY, 1924

1st and 2d, fair over the great central valleys and moderate cold spell. 3rd and 4th, falling barometer and rain or snow over the great central valleys and southern states; fair in the northwest and northeast. 5th and 6th, continued low barometer and local storms over middle and southern states; high pressure and cold wave covering the Rocky Mountains and the northwest. 7th and 8th, generally fair; cold wave. 9th and 10th, stormy; light rains or snows. 11th to 13th, cold wave; zero temperature north. 14th and 15th, milder and stormy; colder in the northwest, with mercury below zero. 16th and 17th, fair; cold wave; high northerly winds and snow flurries in northeastern states; cloudy and stormy in far west. 18th to 20th, unsettled period; snow in middle and northern states and rains in east Gulf states; continued cold in New England and upper Missouri river valley. 21st to 24th, storm period; snow and severe cold in middle and northern states, with high winds and blizzards; rains in southern and eastern states. 25th to 27th, cold wave; fair. 28th to 31st storm period; warmer in southeast on 28th and 29th; colder in North on 30th and 31st. Month will be colder than average generally and precipitation about normal.

FARM AND GARDEN BULLETIN

January.—From 3rd to 8th, very unfavorable to plant and sow. 9th to 11th, extra good days to plant and sow all kinds of crops, especially crops producing their yield above the ground. 12th and 13th, unfavorable. 14th to 17th, plant root crops only. 18th, good to plant cucumbers and melon; sow peas and plant beans. 19th to 21st, favorable for sowing peas and planting beans, 22nd and 23rd very bad for planting. 24th and 25th, bad time. 26th and 27th, reasonably good for all crops. 28th to 31st, unfavorable. Best time to butcher hogs and beeves is from 22nd to 30th; worst time from 6th to 14th. Favorable time to fish and castrate live stock on 9th, 10th and 11th. Set hens and start incubators on 14th to 17th, inclusive. Graft trees and prune vines from 7th to 18th.

MISCELLANEOUS "TIPS"

The life of linoleum on floors can be lengthened by giving it a good coat of varnish frequently.

When the Christmas tree has served its purpose as a decoration, plant it outdoors and place suet and crumbs on it. The birds will enjoy their Christmas tree quite as much as the humans have before them.

A fire in a chimney may be stopped by closing all windows and doors shutting off ventilation, and holding a wet blanket in front of the fire-place to prevent draft from going up a chimney.

Q—for the Quail in the hedges. With pretty brown spots on his breast;

R—for the rapid Road-runners. To eat lizards and snakes they like best.

CHAMBERLAIN'S COLIC AND DIARRHOEA REMEDY

For Sudden and Severe Pain in Stomach, Bowels, Intestinal Cramp, Colic, Diarrhoea

50 years in use when needed **50** times its cost for a single dose
years dependable worth

Reduced Facsimile

Chamberlain's Colic and Diarrhoea Remedy possesses one unique characteristic among medicines: it is made solely and only for the one purpose of immediately relieving those sudden onsets of severe pain in the stomach and bowels, for intestinal cramps (whatever the cause), colic and diarrhoea. For every family, every individual, should keep a bottle of it handy, as these attacks occur unexpectedly and often cause almost unbearable pain, great distress and anxiety before medicine can be obtained or a physician summoned.

No matter what the cause of the seizure, whether from something eaten, either of fruit, vegetable or meat, some liquid taken into the stomach, from chill or from exposure, Chamberlain's Colic and Diarrhoea Remedy will give immediate relief, readjust the circulation, stop the unnatural and weakening bowel action and bring the sufferer out of the dangerous condition.

Mothers going away with children for the summer, hunters, fishermen, travelers, who meet new living conditions with change of water, should protect themselves with a bottle of this medicine. It stands for safety and security against a very possible emergency which failure to provide against would cause great and maybe lasting regret.

WEATHER FORECAST FOR FEBRUARY, 1924

1st to 3rd, storm period; general rough spell of weather; rain in south and sleet, snow and cold weather in middle and northern states. 4th to 6th, cold wave; freezing weather reaching well into the Gulf states. 7th to 9th, storm wave; heavy rains in east Gulf States and rains turning to sleet and snow further north; high barometer and cold wave in the northwest. 10th, generally fair over central longitudes; stormy in west and northeast. 11th to 14th, unsettled and generally milder over middle and southern states; colder and fair in the west and northwest on 13th and 14th; rising temperature in the east. 15th to 18th, much colder over central valleys and southern states; warmer in the west and northwest; snow storms in lake region on the 17th and in New England on 18th. 19th to 21st, milder and local storms in Gulf regions; generally very cloudy; snow flurries further north. 22nd to 24th, storm period; especially severe in the lake states and the northwest; heavy snows in the north and warm rains in the south; fair in southwest. 25th to 29th, mild period; generally fair except local storms on 27th and 28th. Month slightly warmer than average and precipitation slightly below normal.

FARM AND GARDEN BULLETIN

February.—From 1st to 5th, very unfavorable to plant and sow. 6th and 7th, fine days for planting and sowing. 8th to 10th, very bad days. 11th and 12th, fine to plant and sow root crops. 13th to 15th, unfavorable, except for cucumbers and melons. 16th and 17th, good for sowing garden peas and beans. 18th and 19th, unfavorable. 20th and 21st, bad time to plant, sow or transplant. 22nd to 24th, good time to plant Irish potatoes, being in dark of Moon and a favorable sign also. 25th to 29th, very unfavorable. Best time in February to butcher hogs and beeves from 11 o'clock on 20th until close of month; worst time from 4th to 13th. Good time to cut timber, so it will last well from 20th to 29th. Graft trees and prune vines from 5th to 13th, inclusive; also favorable to transplant all vines and shrubs. Fish and castrate live stock on 6th and 7th. Set hens and start incubators from 13th to 16th, inclusive. Eggs set on 20th and 21st will not hatch well.

HOUSEHOLD HINTS

When preparing Hamburg steak, add an equal quantity of ground raw potato. It makes the meat seem different from ordinary Hamburg steak and it will go farther.

Mix together equal parts of salt and flour and rub it through the bristles of brushes. When the mixture is shaken out the brushes will look like new.

S—for the little Song Sparrow. Very early in spring he appears;

T—for the reddish brown Thrasher. Whose musical song charms our ears.

SAME OLD STORY, BUT A GOOD ONE

Mrs. Mahala Burns, Savanna, Mo., relates an experience, the like of which has happened in almost every neighborhood in this country, and has been told and related by thousands of others, as follows: "I used a bottle of Chamberlain's Colic and Diarrhoea Remedy about nine years ago and it cured me of flux (dysentery). I had another attack of the same complaint three or four years ago and a few doses of this remedy cured me. I have recommended it to dozens of people since I first used it and shall continue to do so for I know it is a quick and positive cure for bowel troubles."

GIVES JUST THE SAME GOOD RESULTS NOW AS THEN

Mrs. L. T. Welch, Huntsville, Ala., says when her son at twelve years of age, had a relapse from the measles, he was near death from bloody flux, so the Doctor said, and after obtaining no relief from his remedies, she began the use of Chamberlain's Colic and Diarrhoea Remedy and after only twenty-four hours, the boy was up. This was twenty-four years ago and she has used this remedy from time to time ever since with the same good results.

"THE BEST IN THE WORLD" SHE SAYS

You can never tell just how good a medicine is until you have tried it in a time of need and found it trustworthy. That is the way Chamberlain's Medicines gained their splendid reputation—by always living up to their reputation and giving entire satisfaction to their users. Mrs. S. S. Green, of McLain, Miss., says; "I have used Chamberlain's Colic and Diarrhoea Remedy and results cause me to think it to be the best in the world."

CHOLERA MORBUS IS A FEARSOME THING

"I drive the Rural Delivery No. 1 out of Kaw-kawlin, Mich. I was in very bad shape with cholera morbus when I got a bottle of Chamberlain's Colic and Diarrhoea Remedy which soon put me on my feet again so I was able to go on with my work."

D. W. Paige.

For pain in the stomach, colic and cholera morbus this remedy gives prompt relief. Try it.

HOT WEATHER DISEASES

Disorders of the bowels are extremely dangerous, particularly during the hot weather of the summer months, and in order to protect yourself and family against a sudden attack, get a bottle of Chamberlain's Colic and Diarrhoea Remedy. It can be depended upon. Many have testified to its excellence.

CREAM FOR BUTTER IN CAKE

The busy farm wife who churns her own butter may save time and work when making cake by using cream instead of butter. Instead of churning the cream, use the same amount of cream that the recipe calls for of butter and milk, then cream the cream with the sugar.

WEATHER FORECAST FOR MARCH, 1924

1st to 3rd, fair period; severe cold in northern states and milder in middle and southern sections; unsettled in Rocky Mountain region. 4th to 6th, storm period; severe gales probable along the Gulf coast, accompanied with heavy rains very widely distributed, turning to snow and ice in Northern states. 7th, cold wave over central valleys; falling barometer and unsettled in the west. 8th and 9th, milder and threatening, with brisk showers and high winds on the 8th in middle sections. 10th, generally fair and frosty. 11th, cloudy and stormy over middle and southern states; fair and cooler in the west and northwest. 12th and 13th, cold wave and fair over middle sections; cold and cloudy with much sleet, cold rains and snow over middle and southern Rocky Mountain districts. 14th and 15th, cold rains turning to sleet and snow at many points east of Okla. and Kansas. 16th to 18th, cool wave; generally fair and frosty. 19th, fair and warmer. 20th to 22nd, storm period; a characteristic "March storm," high winds and very stormy; sleet and snow in northern sections. 23rd to 25th, cold wave. 26th to 28th, warmer and threatening local storms on 26th and 28th. 29th to 31st, cold, frosty period. Temperature for the month below and precipitation above average.

FARM AND GARDEN BULLETIN

March.—1st to 3rd, unfavorable to plant and sow. 4th to 6th, fine for planting crops, especially crops producing their yield above ground. 7th and 8th, bad days. 9th to 11th, good for root crops. 12th and 13th, good to plant cucumbers and melon. 14th and 15th, extra good for sowing peas, grass seed and clover. 16th to 18th, bad time to plant and sow. 19th and 20th, very unfavorable for planting and sowing. 21st and 22nd, moderately good for all crops. 23rd and 24th, moderately good for planting Irish potatoes, radishes, beets and onions. 25th to 30th, unfavorable for all crops, except for Irish potatoes, radishes and onions on the 25th and 26th. Seeds planted on 29th and morning of 30th will rot. 31st, fine day for planting all kinds of crops. Butcher hogs and beeves from 21st to 31st. Graft trees and prune vines from 5th to 13th. Fish and castrate live stock on 4th, 5th, 6th and 31st. Set hens and start incubators from 14th to 17th, inclusive.

"TIPS"

A silver spoon placed in a bottle or tumbler before pouring hot liquid in it will prevent that annoying cracking.

Cayenne pepper sprinkled around places where mice frequent will keep them away.

U—for the New Zealand Utic. When frightened he hides in his nest;

V—for the buff-breasted Veery. 'Tis the brook in the woods he likes best.

CHAMBERLAIN'S SALVE

An excellent salve to be applied liberally for burns, scalds, cuts, wounds, sores, and for such skin affections as ring-worm, tetter, eczema, scald-head, etc.

It is bland, soothing and efficacious. Does not become rancid. Price 25c.

Burns and Scalds.—Chamberlain's Salve allays the pain of a burn almost instantly and causes the parts to heal without leaving a scar, unless the injury is very severe.

Eczema.—Do not permit this disease to keep you in torment when one application of Chamberlain's Salve will help.

Tetter and Salt Rheum.—The itching and smarting characteristic of these diseases is quickly allayed by Chamberlain's Salve.

Barber's Itch.—Some very bad cases of this disease have been permanently relieved by Chamberlain's Salve.

Sore Nipples.—Chamberlain's Salve may be relied upon to help sore nipples.

Piles.—Chamberlain's Salve for itching piles affords almost instant relief.

Reduced Facsimile

CHAMBERLAIN'S TOILET CREAM

A Perfect Skin Beautifier

Every one notices a clean healthy skin and admires it. Every person wants a good-looking skin and the air of cleanliness and good grooming that it gives. It is not hard to possess such a skin nor does it cost much in either time, money or effort.

Reduced Facsimile

Chamberlain's Toilet Cream will do it at but a small cost and with almost no time or labor spent at it. It gives that velvety smoothness so much admired. It obliterates the wrinkles, tones up the skin and is a tonic and cleanser as well. It will not make the skin oily or greasy and will not grow down or hairs. Use it regularly just when it is convenient for you to apply it,

wiping off whatever the skin will not absorb, dusting over with your favorite powder or a good talcum (and Chamberlain's Violet Talcum is recommended for that purpose), and your skin and your appearance will be a pleasure and a satisfaction to you.

Your druggist can supply you with both Chamberlain's Toilet Cream and Chamberlain's Violet Talcum, but if for any reason he should be out of them, write us.

WEATHER FORECAST FOR APRIL, 1924

1st to 4th, storm period; high winds and very stormy over the central valleys; heavy rains and thunder storms over the south and extending to Ohio and southern Indiana; unusually cold in the west and northwest. 5th and 6th, cold wave; killing frosts as far south as Tenn. and Okla. 7th, fair and moderating east of Mississippi river; unsettled in states of the Rocky mountains. 8th and 9th, storm over the middle Mississippi river valley, causing high winds, rain and thunder, danger of tornadoes in Mississippi and Arkansas; cold weather in upper Missouri River valley. 10th to 12th, cool wave; killing frosts in middle and northern states; much warmer in the far west on 11th and 12th. 13 to 15th, mild and threatening, with brisk showers and thunder storms; clearing and cooler in the west and northwest on 14th and 15th. 16th and 17th, fair and cool. 18th to 20th, storm period; high winds and showers. Danger of tornadoes in the Plain states. 21st to 23rd, cool wave; frosts in the north and west. 24th and 25th, showers. 26th to 28th, mild period; fine growing weather; dry and dusty in the southwest from Nebraska to Texas and Arizona. 29th and 30th, warm, with showers. Temperature for April about normal. Precipitation deficient in southwest; normal elsewhere.

FARM AND GARDEN BULLETIN

April.—1st and 2nd, fine time to plant all kinds of crops. 3rd and 4th, unfavorable. 5th to 7th, good for root crops. 8th and 9th, unfavorable for planting, except for all running vine crops, such as cucumber, squash and melon seeds. 10th to 12th, sow peas and plant beans; also favorable to sow tomato and lettuce seeds. 13th to 16th, very unfavorable for planting and sowing. 17th and 18th, moderately good. 19th and 20th, fine time to plant corn after 8 a. m. on the 19th; unfavorable for other crops. From 21st to 27th, bad time to plant and sow. 28th and 29th, extra fine time to plant and sow most all kinds of crops, especially good for Irish potatoes, beets, turnips, peas, and radishes. 30th, unfavorable for all crops, except to sow for hay crops, such as millet and grass. Best time to kill pork, beef and all animal meat, will be from 19th to 26th, inclusive; worst time 4th to 13th. Graft trees and prune vines from 4th to 12th. Castrate live stock on the 1st, 2nd, 27th and 28th. Fish on 1st, 2nd, 28th and 29th. Set hens and start incubators from 12th to 14th; very unfavorable on 15th and 16th.

FOR PAINT SPOTS

Spots of paint can be quickly removed from window glass by applying hot vinegar.

W—for the soft colored Wax-Wings. They will eat from your hand if you like;

X—for the Xeno-Pi-Ros-Tris. Whose other name is just plain Shrike.

WHY NOT HAVE NICE HANDS YOURSELF! Chamberlain's Hand Lotion Will Do It

Other people have and it is so embarrassing when your own are not nice by comparison. At the Card Club, the Neighborhood Club, the Church Meetings, it is really most tiresome, and quite unnecessary to feel apologetic for the state of your hands. Use Chamberlain's Hand Lotion, and see how quickly it changes rough, red, chapped hands into soft, white and presentable ones. It is easily applied, is nether greasy nor sticky, dries quickly into the skin and is agreeably scented. Its regular use keeps the nails in good condition, prevents their breaking easily, stops hang nails and painful finger cracks.

WATCH THE CHILDREN'S HANDS

Teach them pride in the appearance of their hands and they will thank you later for it. Accustom them to the good habit of using Chamberlain's Hand Lotion and "good hands" will be the result.

Your druggist sells it, but if for any reason you cannot get it of him, write us at once.

CHAMBERLAIN'S SHAMPOO MIXTURE

For A Healthy Scalp and Better Hair

This is the shampoo that gives you just what you have been looking for in a shampoo.

First, it cleanses the hair and scalp very thoroughly.

Second, it stops falling hair and promotes a healthy growth.

If you have any pride at all in the appearance of your hair, if you have any wish to preserve what you have and increase its health and growth, just use Chamberlain's Shampoo regularly and watch the satisfying results.

Children's hair should have careful attention for the hair is important and a wise mother can do much for her child's hair by regular and intelligent care of it. Some soaps and some shampoos contain too much alkali for the good of the hair and scalp. They are too drying and make the hair brittle and faded but Chamberlain's Shampoo gives the much desired soft, fluffy, glossy effect and has a very beneficial action on the scalp as well.

Before putting earth in window boxes white-wash the inside of the box. It keeps the box from rotting and prevents insects.

To get the best out of plants they should be cultivated frequently. Keep an old fork near the pots and use it to loosen the earth.

1st and 2nd, generally fair east of the Mississippi river; cloudy and warm with showers over western states. 3rd to 5th, storm period; violent thunder storms and daily showers in Plain states, the Northwest and Lake regions; fair and warm growing weather in the south and east. 6th and 7th, low barometer over the Mississippi river valley bringing brisk showers and thunder storms to middle and southern sections and dry, windy weather in the southwest. 8th and 9th, cooler and generally pleasant; showers in extreme east and in Rocky Mountain regions. 10th to 12th, violent electrical storms in middle and southern states; high winds and unsettled in Plain states, with danger of tornadoes. 13th to 15th, cool wave; northerly winds and generally fair. 16th and 17th, stormy in the west; fair and warm east of Oklahoma. 18th to 20th, stormy through the middle, southern and eastern sections; fair and cool west of Mississippi river. 21st to 24th, pleasant period. 25th to 28th, warm growing weather; fine weather on growing crops, with sufficient moisture generally. 29th to 31st, great electrical displays and fine rains, except in far southwest. Both temperature and rainfall for the month above average, except a deficiency in far southwest.

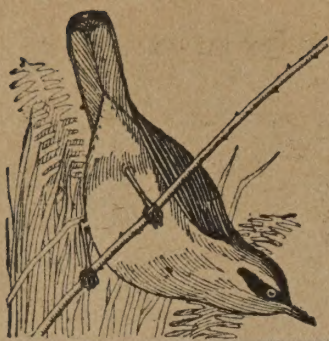

FARM AND GARDEN BULLETIN

May.—1st and 2nd, unfavorable. 3rd and 4th, moderately good for planting root crops; unfavorable for other crops. 5th to 7th, good time to plant melon, cucumber and squash seeds. 8th and 9th, fine time to plant beans and peas; extra good day to plant pole beans on 8th. 10th and 11th, good time to kill weeds, briars, bushes, etc.; unfavorable for planting. 12th to 14th, very bad to plant, sow or transplant. 15th and 16th, good time to plant crops for hay, such as millet, grass and clover. 17th and 18th, fine time to plant corn. 19th to 24th, very unfavorable; seeds planted on 23rd and 24th will rot. 25th and 26th, extra fine for planting and sowing all crops, especially good for Irish and Sweet potatoes, onions, beets, radishes, turnips, carrots, parsnips, etc. 27th to 29th, unfavorable, except for hay crops. 30th and 31st, good for root crops only. Best time to kill pork, beef and all animal meat is from 19th to 25th, inclusive; worst time 3rd to 11th. Best time to fish and castrate live stock is on 25th and 26th. Set hens and start incubators from 15th to 20th.

"TIPS"

Salt sprinkled over carpets preserves the colors and keeps away moths.

A weak solution of alum will revive the colors of a faded carpet after sweeping.

Y—is the Western Yellow Throat. With his “witchity-witchity” song;

Z—is a dove named Zenaida. You hear his “coo” all the day long.

WEATHER FORECAST FOR JUNE, 1924

1st to 4th, warm period; showers and thunder storms in northern states on 2nd and northeast on 3rd. 5th to 7th, unsettled; light rains in central and western districts; fair in the east and north. 8th to 10th, storm period; electrical storms and frequent rains extending from Texas to Mich. and eastward to Indiana and Ohio, dry in Wyo. and N. D. 11th to 15th, cooler and pleasant in the lake region, but warm, growing time in other sections; light showers in Oregon and Washington on 12th and 13th. 16th to 18th, violent thunder storms and abundant rainfall over a large territory; damaging wind storms in the middle west and in middle Atlantic states. 19th and 20th, generally fair; hot and dry in California, Nevada, Utah and western Texas; dry and windy in Wyoming and North Dakota. 21st to 24th, Summer Solstice storm period; heavy rains in southern and middle states; light showers in west and far east; high winds and very stormy in upper Mississippi river valley and lake region. 25th to 28th, generally fair and pleasant in middle and northern states; moderately warm south and very hot in far southwest. 29th and 30th, fierce heat in the west and northwest; heavy showers and afternoon thunder storms over middle, southern and eastern sections. Rainfall above and temperature normal for June.

FARM AND GARDEN BULLETIN

June.—From 1st to 3rd, plant running vine seeds, such as cucumber, squash, melon, etc. 4th and 5th, fine time to plant beans and peas and sow grass, clover and millet. 6th to 8th, extra fine time to kill weeds, cut briars, bushes, etc., so as to destroy them. 9th and 10th, unfavorable. 11th and 12th, moderately good for all crops; fine time to sow seeds for hay and plant late corn for fodder. From 13th to 20th, bad time for planting and sowing all kinds of crops; seeds planted on 19th and 20th will likely rot in ground. 21st to 23rd, fine for planting all root crops, and moderately good for other crops. 24th and 25th, unfavorable, except good for sowing grain for hay. Seeds sown on these days will produce much vine and stalk and but little grain. 26th to 28th, good for root crops only. 29th and 30th, unfavorable, except for corn. Best time to kill pork, beef and all animal meat is from 17th to 25th; worst time 2nd to 11th. Best time to graft trees and prune vines is from 2nd to 13th. Fish and castrate live stock on the 21st, 22nd and 23rd. Set out tomato and sweet potato slips on same dates. Set hens and start incubators from 11th to 15th.

MOTTO FOR A MARRIED MAN

Be sure you're right, and then keep quiet about it.

DY-O-LA DYE

For Tinting and Dyeing

DY-O-LA Dyes can be used as cold water tints, and are just as wonderful for that purpose as they are as a fast color dye. You can get beautiful tints from DY-O-LA, ranging from the most delicate to the deepest shade. Still more wonderful, you can wash your material three and four times without the color fading, provided you wash with cold water.

DY-O-LA Dyes are so easy to use as cold water tints—and so economical.

A package will last you practically the whole summer. Dissolve a package in a quart of boiling water, stirring it well. Then pour into a bottle. If tightly corked and kept in a dark place it will keep for weeks.

Wash and rinse your material thoroughly. Then, to the last rinsing water add just a little of the DY-O-LA solution—just as you would blueing—and let your material soak for a couple of minutes. If the tint is not deep enough, add more DY-O-LA. Don't wring your material, just squeeze it gently. Iron silks when half dry.

For tinting starching materials add a little DY-O-LA solution to the starch as well as to the rinsing water. Cotton materials come out a darker tint than silks, so less DY-O-LA is required.

If you only want to Tint your goods—same as blueing—simply dissolve just a few grains in a cup of hot water, and pour into your rinsing water, and give it a swish with your hand to mix it. Use it the same way you would laundry blueing. Always have the goods wet before you tint them.

By mixing two or three colors you can get the most beautiful new colors and shades. Prepare each package separately and mix the solutions as you require them. To remove the color wash with very hot water and soap.

The best DY-O-LA colors to use for tinting are: Blue, Light Green, Yellow, Orange, Pink, Purple, Dark Wine and Old Gold. On silks, very light shades of Scarlet and Cardinal will give pretty colors.

With DY-O-LA you can color cotton, silk, wool or mixed goods with the same package and at the same time. There is no chance for a mistake; you don't have to rip off trimmings or take out linings because they are different material. Put the garment complete (trimmings and all) into the same bath—if you desire it all one color—and it will dye perfectly with one operation. Saves time, saves money, saves mistakes, for with the old fashioned package dye it was necessary to have a dye for each kind of material. All of this is done away with in the use of DY-O-LA.

Take some of your discarded blouses or dresses, dye them with one of the sixteen different colors of DY-O-LA, and you will be surprised at the result. They will look as if they had just come from the dressmaker's.

Remember! The colors will be just as fast and durable as they are beautiful. They won't rub off or bleach out.

What is more, you can use DY-O-LA on the most costly and delicate fabrics; it contains no acids.

DY-O-LA is cleanly to use, for the dye is all absorbed into the material and none of it stains the hands or kettle. Follow carefully the printed directions with each package and you cannot possibly make any mistake.

Be sure you get DY-O-LA DYE.
